

# Monthly Indicators

## September 2016

As anticipated at the outset of the year, demand has remained high through the first three quarters of 2016, propping up sales and prices despite heavy reductions in inventory and months of supply across the country. With rental prices and employment opportunities in a consistent climb, year-over-year increases in home buying are probable for the rest of the year but not guaranteed.

New Listings were down 5.1 percent to 564 in Stark County and down 23.9 percent to 35 in Carroll County. Pending Sales increased 17.9 percent to 455 in Stark County and increased 85.0 percent to 37 in Carroll County. Inventory shrank 26.1 percent to 1,342 units in Stark County while grew 1.8 percent to 166 units in Carroll County.

Median Sales Price was up 6.4 percent to \$123,900 in Stark County and up 21.7 percent to \$79,000 in Carroll County. Days on Market in Stark County decreased 11.0 percent to 65 days in Stark County and increased 13.0 percent to 104 days in Carroll County. Months Supply of Homes for Sale was down 30.8 percent to 3.6 months in Stark County and down 11.0 percent to 7.3 months in Carroll County, indicating that demand increased relative to supply.

In general, today's demand is driven by three factors: Millennials are reaching prime home-buying age, growing families are looking for larger homes and empty nesters are downsizing. However, intriguingly low interest rates often prompt refinancing instead of listing, contributing to lower inventory. Recent studies have also shown that short-term rentals are keeping a collection of homes off the market.
